

NXPowerLite for Microsoft Exchange

Reduce email server storage and shrink your backups

NXPowerLite software automatically reduces email storage space by replacing large PDF, Microsoft Office, JPEG and TIFF file attachments with smaller optimized versions.

The Problem

Exchange databases expand rapidly, with the average employee emailing both more documents and larger documents than ever before. Many of the files that are emailed by users are image-heavy files (.pdf, .docx, .pptx) and images (.jpg, .tif) that don't compress well, because they contain already compressed data.

The Solution

NXPowerLite automatically finds and reduces large PDF, Microsoft Office, JPEG and TIFF file attachments in the Exchange store using our proven file optimization engine. Adding NXPowerLite to your toolbox is an easy and effective way to keep your Exchange database as small as possible, making it simpler to manage.

Key Benefits

Extend email server life

Get full value from your hardware investment – optimizing files makes sure you get more years' service from your servers.

Control storage growth

Run regularly NXPowerLite reduces new attachments, slowing down the rate of growth, keeping the database manageable and giving you time to plan effectively for expansion.

Shorten backup & recovery windows

Reducing the size of source files shrinks your backup, shortening backup windows making sure they complete out of hours.

Reduce managed backup costs

Reducing your Exchange database means you have less to backup, which cuts managed backup costs.

Improve email responsiveness

Smaller email attachments mean quicker load and send times when users request or forward their emails.

Migrate less data

Optimizing email attachments before you migrate reduces the amount of data to move, and minimises the space consumed on your new device.

"NXPowerLite is excellent software for optimising files to dramatically reduce storage"

Caerphilly County Council

Reports

NXPowerLite generates comprehensive reports detailing how storage was being used and the savings obtained by optimizing email attachments.

Works with Windows Task Scheduler

To make it easy to run NXPowerLite at convenient or low-traffic times, it is fully compatible with Windows task scheduler meaning you can 'Start' or 'Stop' the service from other events. NXPowerLite will remember where it was stopped, and resume smoothly from where it left off.

Status

The status bar will tell you how many files have been optimized, how much space has been reclaimed and how long it has been running.

Connects via Exchange Web Services

NXPowerLite connects to Exchange via the Exchange Web Services (EWS) API, and uses our proven optimization engine to ensure email attachments are safely and efficiently reduced.

"NXPowerLite is a really robust, amazing product which offers great value for money. It was exactly what I was looking for."

Arc Legal Assistance Ltd.

System requirements

Compatible with any of the Microsoft Windows environment detailed below:

- Microsoft Exchange Server 2010 (R2)
- Microsoft Exchange Server 2013

Requires .NET version 3.5 - 4.5 installed.

Languages

English

Supported file types

- Microsoft® Word documents (Word 97-2013)
- Microsoft® Excel® spreadsheets (Excel 97-2013)
- Microsoft® PowerPoint® presentations (PowerPoint 97-2013)
- All PDF files (except PDF Portfolios)
- JPEG images
- TIFF images (uncompressed TIFFs only)
